

## Alexandros D. Tselepis, MD, PhD

*Professor of Biochemistry-Clinical Chemistry University of Ioannina, Greece*  
*Director of the Atherothrombosis Research Center of the University of Ioannina*

Alexandros D. Tselepis is Professor of Biochemistry–Clinical Chemistry in the University of Ioannina, Greece. He graduated in **Pharmacy** from the School of Pharmacy, University of Thessaloniki, Greece, in 1979 and obtained his PhD in Clinical Biochemistry in 1986 from the University of Ioannina, Greece. His research studies continued with a **Postdoctoral Fellowship (Fogarty, NIH)** in the Pathology Department, University of Texas Health Science Center, San Antonio, TX, USA (1988–1989). Subsequently, he graduated in **Medicine** at the School of Medicine, University of Ioannina, gaining his MD in 1992. After initial appointments as Assistant and Associate Professor of Biochemistry–Clinical Chemistry in the University of Ioannina, he took up his current position in 2006. Professor Tselepis is also the Director of the Atherothrombosis Research Center of the University of Ioannina.

Professor Tselepis' main scientific interests are in the pathophysiology of Atherothrombosis. Professor Tselepis has obtained research grants from National, EU and Private Sources of more than 2M€, the last 5 years. He has more than 200 publications in international journals and more than 4.900 citations, whereas his h-index is 37.

Professor Tselepis is Editor of the Hellenic Journal of Atherosclerosis, Section Editor (Vascular and Cellular Clinical Biochemistry) of *Vascular Disease Prevention*, Associate Editor of the *American Journal of Biochemistry and Biotechnology*, and he is on the Editorial Board of *Platelets*. Professor Tselepis is president of the Hellenic Atherosclerosis Society, president of the Institute for the Study and Education on Thrombosis and Antithrombotic Therapy, and a fellow of several national and international scientific societies including European Atherosclerosis Society, International Atherosclerosis Society and International Society on Thrombosis and Haemostasis. He has participated in several European Research Networks and he has developed fruitful collaborations with several foreigner Universities and Research Centres.
